I know and on Halloween too, poor cows. Thank goodness it's not there anymore. I am giving this to our Water Department and we'll see what they say. I know there is a lot going on with the water at that site.

Thanks again

So I was doing some reading online last night in regards to the property greens at Chester and the history. I attached a screen shot I found an article online that says the Hazardous chemicals from that property were listed on the building permit. Any idea what those chemicals were or if that is what is leaking through the ground in the surrounding area? Poor little cows that went to slaughter are coming back to haunt LOL

I definitely have to agree with you, they don't care about anyone but themselves.

Get rid of this little roaches. LOL I watched one back into my car the other day parked in front of my office. He was lucky it was light and no damage cause I was ready to scream and yell at him. He just looked at me and walked away. They are so rude!!!!

Don't know exactly what chemicals but I heard there was definitely some contamination. Should be interesting when I have the Water Department read all of this information.

You are the best,
MaryAnn
